

## **Create The IBM Watson IoT Platform And A Device**

<b>Project Title</b>	SmartFarmer – IoT Enabled Smart Farming Application
<b>Team ID</b>	PNT2022TMID11788
<b>Content</b>	IBM Cloud and Device Creation

## STEP 1:

Login into your IBM Cloud.

The screenshot shows the IBM Cloud login interface. At the top, a dark navigation bar contains the 'IBM Cloud' logo on the left and links for 'Catalog', 'Cost estimator', and 'Docs' on the right. The main content area has a dark background with a large blue abstract shape. On the left, there is a cloud icon, the text 'Log in to IBM Cloud', and a link 'Don't have an account? Create an account'. Below this, a 'Sign in with' section features a dropdown menu set to 'IBMid' and a text input field containing 'username@example.com'. A prominent blue 'Continue' button with a right-pointing arrow is positioned below the input field. At the bottom left, there is a link 'Forgot ID?' and a checkbox labeled 'Remember ID'. In the bottom right corner, a 'Cookie Preferences' link is visible.

## STEP 2:

After Login you will redirected to your dashboard. Search Internet of Things and Click on it.

## STEP 3:

Now click on existing instance and then click Launch. Now you will be redirected to new page and Sign In again if it's prompt. Next select your org.

The screenshot displays the IBM Watson IoT Platform website in a web browser. The browser's address bar shows the URL `internetofthings.ibmcloud.com`. The page header includes the text "IBM Watson IoT Platform" and a user profile section with the email `venkatesansiva038@gmail.com` and the prompt "ID: (select org)".

The main content area features a dark blue background with a circuit-like pattern of white lines. In the center, the word "Cars" is written in large white font. To the left of "Cars", the text "Collect data from" is positioned above an icon of a factory. To the right of "Cars", the text "and make value from it" is positioned above an icon of a person. Below the "Cars" text, there is a "Learn More" link with a downward-pointing arrow.

The bottom of the browser window shows a Windows taskbar with various application icons, including the Start button, search bar, and icons for File Explorer, Google Chrome, and others. The system tray on the right indicates the temperature is 28°C, the weather is Haze, and the time is 10:11 PM on 19-11-2022.

## STEP 4:

Go to Devices section, there click on Add Device. There enter your device type and device id. Then click Next and Click Next again.

The screenshot shows the IBM Watson IoT Platform interface. The top navigation bar includes the platform name, a help icon, a user profile icon, and the email address 312819106035@smartinternz.com with ID: x0fxss. The left sidebar contains various icons for navigation. The main content area displays the 'Add Device' wizard with a progress bar showing four steps: Identity (selected), Device Information, Security, and Summary. Below the progress bar, a message states: 'Select a device type for the device that you are adding and give the device a unique ID.' There are two input fields: 'Device Type' with the value 'Arduino' and 'Device ID' with the value '1234'. At the bottom right, there are 'Cancel' and 'Next' buttons.

### Add Device

Identity Device Information Security Summary

Select a device type for the device that you are adding and give the device a unique ID.

Device Type: Arduino

Device ID: 1234

Cancel Next

## STEP 5:

Enter your authentication token or otherwise it will be auto generated and then click Next and then click Finish.

The screenshot shows the IBM Watson IoT Platform interface. The top header displays the platform name, a help icon, a user email (312819106035@smartinternz.com), and a user ID (ID: x0fxss). The left sidebar contains navigation icons for various platform features. The main content area is titled 'Security' and shows a progress bar with four steps: Identity, Device Information, Security (current), and Summary. Below the progress bar, there are two options for selecting a device authentication token: 'Auto-generated authentication token (default)' and 'Self-provided authentication token'. The 'Auto-generated' option is selected, and a text box labeled 'Authentication Token' displays the value '123456789'. Below the text box, there is a warning message: 'Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.' and a note: 'Authentication token are encrypted before we store them.'

Identity Device Information Security Summary

There are two options for selecting a device authentication token.

**Auto-generated authentication token (default)**

Allow the service to generate an authentication token for you. Tokens are 18 characters and contain a mix of alphanumeric characters and symbols. The token is returned to you at the end of the device registration process.

**Self-provided authentication token**

Provide your own authentication token for this device. The token must be between 8 and 36 characters and contain a mix lowercase and uppercase letters, numbers, and symbols, which can include hyphens, underscores, and periods. Do not use repeated characters, dictionary words, user names, or other predefined sequences.

Authentication Token 123456789

Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.

Authentication token are encrypted before we store them.

## STEP 6:

Now you can see your Device Credentials.

The screenshot shows the IBM Watson IoT Platform interface. The top header displays the platform name and user information. The left sidebar contains a navigation menu with icons for various functions. The main content area is titled 'Device Drilldown - 1234' and features a 'Device Credentials' section. This section includes a descriptive paragraph and a table of credentials. A warning message is displayed at the bottom of the credentials section.

### Device Drilldown - 1234

- Device Credentials
- Connection Information
- Recent Events
- State
- Device Information
- Metadata
- Diagnostics
- Connection Logs
- Device Actions

#### Device Credentials

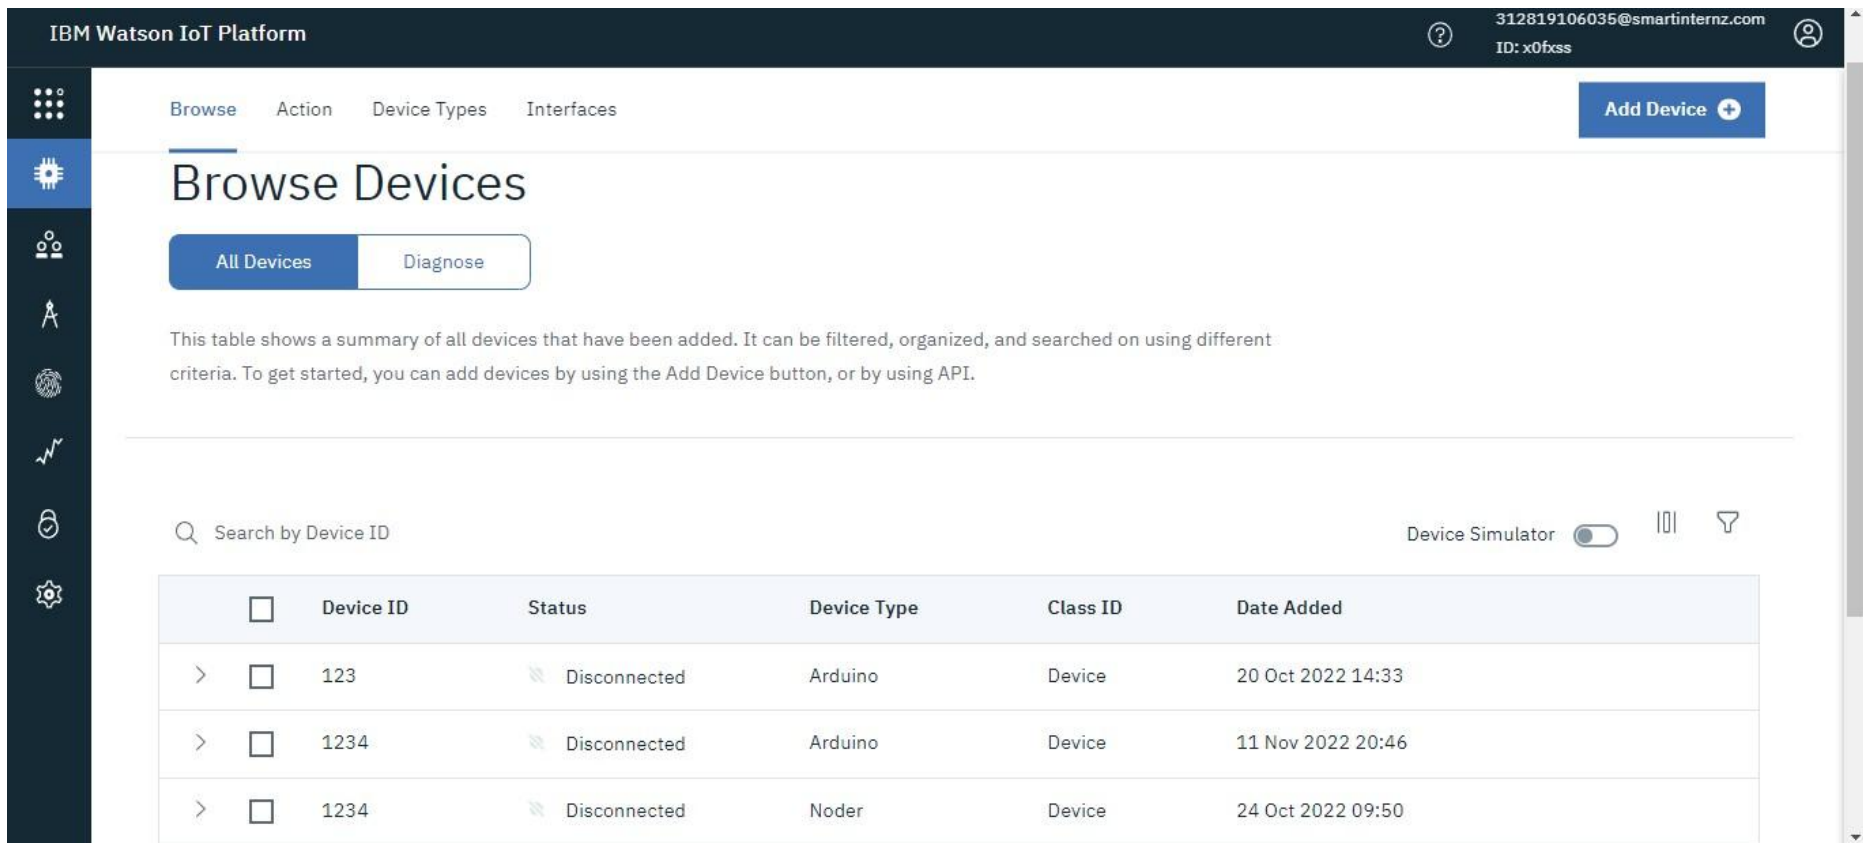

You registered your device to the organization. Add these credentials to the device to connect it to the platform. After the device is connected, you can navigate to view connection and event details.

Organization ID	x0fxss
Device Type	Arduino
Device ID	1234
Authentication Method	use-token-auth
Authentication Token	123456789

**!** Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token.

## Step 7:

Now click Back, there you can see the list of devices you created with device type, device id, date that device is created and status.
